

Version Release Change Log

Release 2.4.0: 4 April 2023

ADDED

On the Dashboard (“My Workspace”), statistics for downloads of your datasets can be viewed in the block “My Statistics.”

ADDED

Users can subscribe to a newsletter by discipline: Linguistics, Social Sciences or both.

ADDED

Data Service Units can now create more than one download contract with specific usage conditions (“Restricted Access” download contract).

ADDED

Data Service Units can now link or unlink datasets to specific download contracts.

ADDED

Data Service Units can see the affiliated studies of data depositors of their respective discipline(s).

ADDED

Metadata from the SWISSUbase social sciences studies and datasets are now harvested and visible in the public [CESSDA data catalogue](#).

CHANGED

Linguistics researchers from any institution of higher education in Switzerland can deposit data on SWISSUbase. It was previously only open to Universities in Switzerland that were members of the CLARIN-CH consortium.

CHANGED

The public catalogue search filters were updated with new search facets and ordering.

CHANGED

The visualization of file collection contents (on “Dataset Overview”) in the catalogue was updated.

CHANGED

The “Version notes” of Version 1 of a dataset is automatically filled, but still editable. For subsequent dataset versions (e.g. Version 2, 3, etc), the version notes can be filled by the data producer or the data curator.

CHANGED

“Closed contracts” have been renamed to “Restricted” as the datasets available under a restricted contract are accessible with the conditions outlined in the contract.

BUG FIX

If the authors of a dataset citation have been modified, the modifications will be copied when the dataset is duplicated.
