

## Version Release Change Log

### Release 2.3.0: 12 December 2022

ADDED

On the Dashboard (“My Workspace”), the list of “My Studies” and “My Downloads” can be viewed.

ADDED

Direct links to the Data Service Unit contact and discipline or institution-specific resources are provided in a “Need Help?” box.

ADDED

Dataset and datafile metadata can be duplicated for all statuses except “In Review”; “Archiving in progress”; and “Publishing in progress.”

ADDED

Published datasets can be shared via a shareable URL.

ADDED

The structure of a file collection now appears so that file collections can be annotated with additional metadata by selecting the reference path of the folder or file.

ADDED

For the “Linguistic” and “Other” schemas on the File level, the metadata parts (e.g., Language, Audio, etc.) can be copied.

ADDED

Archived datasets can be updated using the new main action “Update.” The archived dataset and metadata can be updated and re-deposited with an updated version number.

CHANGED

The citation on Dataset level has been updated to be aligned with the APA standard. All citation elements are fixed except for the authors, which can be modified by a drag and drop functionality (which is new). The publisher listed in the citation is the respective Data Service Unit.

CHANGED

The “Version Notes” field on Dataset level can be edited by the data producer and also the data curator.

CHANGED

For download contracts with “Prior Agreement” selected, the notification of request to download the data is sent first to the data owner (rather than the data curator, as was the previous process). Then the data owner can communicate to the data curator the approval or denial of the request to download their data.

CHANGED

The citation on Dataset level has been updated to be aligned with the APA standard. All citation elements are fixed except for the authors, which can be modified by a drag and drop functionality (which is new). The publisher listed in the citation is the respective Data Service Unit.

BUG FIX

A file of size 0 cannot be uploaded.

BUG FIX

A Dissemination Information Package (DIP) cannot be created without any files.
