Open research data; open science; research assessment; academic careers; research proposals; research performing organisations; Switzerland

### **Geolocation**

Switzerland

### **Article abstract**

This replication file allows to replicate the findings published in the second deliverable of the project recORD which examines how ORD (Open Research Data) practices are integrated into Swiss Higher Education Institutions (HEIs) assessment procedures. The survey focuses on formalised research assessment practices and ORD policies and supports and considers three assessment situations: individual recruitment and career assessment, research proposal assessment, and research unit assessment.
